

NASA ASTROBIOLOGY INSTITUTE ANNUAL REPORT YEAR [July 2002 - June 2003]

Introduction: Table of Contents

Introduction

[Letter from the Director](#)
[Table of Contents](#)
[Feedback](#)
[Map of Team Locations](#)

Lead Team Reports

[Introduction](#)

Ames Research Center

[Executive Summary](#)
[Project Reports](#)

[Chemical Building Blocks](#)

[Biogeochemistry of Earth's Greenhouse Leading to the Rise of Oxygen](#)

[Rapid Rates of Change](#)

[Early Microbial Ecosystems](#)

[Early Metabolic Pathways](#)

[Ecosystem to Biosphere Modeling](#)

[Life Beyond the Planet of Origin](#)

[Habitable Planets](#)

[Postdoctoral Fellows](#)

[EPO](#)

[Publications](#)

[Team Members](#)

Arizona State University

[Executive Summary](#)
[Project Reports](#)

[Nanoscale minerals as biomarkers](#)

[Evolution in microbe-based ecosystems: Desert springs as analogues for the early development and stabilization of ecological systems](#)

[Microbial Fossilization Processes in Extreme Environments](#)

[Astrobiological Exploration of Mars](#)

[Module 5B: "Exploring the Living Universe: Origin, Evolution and Distribution of Life in the Solar System" \(Europa\)](#)

[Organic Synthesis at High Temperature](#)

[Early Environments](#)

[Impacts and the Origin, Distribution, and Evolution of Life](#)

[Module 1A](#)

[Postdoctoral Fellows](#)

[EPO](#)

[Publications](#)

[Team Members](#)

Carnegie Institution of Washington

[Executive Summary](#)

[Project Reports](#)

[Studies in Planetary Formation and Evolution](#)

[Studies of Organic Matter and Water in Meteorites](#)

[Hydrothermal Organic Synthesis](#)

[Theoretical Studies of Hydrothermal Synthesis Reactions](#)

[Isotopic and Molecular Tracers of Life](#)

[Biological Studies of Hydrothermal Systems](#)

[A New Molecular Recognition Instrument for Astrobiological Applications](#)

[Postdoctoral Fellows](#)

[EPO](#)

[Publications](#)

[Team Members](#)

Harvard University

[Executive Summary](#)

[Project Reports](#)

[Isotopic and molecular approaches to microbial ecology and biogeochemistry \(The evolution of organic matter\)](#)

[The Planetary Context of Biological Evolution: Subproject: Permo–Triassic mass extinction and its consequences](#)

[The Planetary Context of Biological Evolution Subproject: The Proterozoic Oxidation of the Earth's Surface](#)

[The Planetary Context of Biological Evolution Subproject: Neoproterozoic–Cambrian Environmental Change and Evolution](#)

[The Planetary Context of Biological Evolution Sub project: Geobiology of Neogene hematitic sedimentary rocks](#)

[The Planetary Context of Biological Evolution
Subproject: Carbon Cycle and Climate Dynamics of Mars](#)

[Evogenomics Focus Group](#)

[Postdoctoral Fellows](#)

[EPO](#)

[Publications](#)

[Team Members](#)

Jet Propulsion Laboratory

[Executive Summary](#)

[Project Reports](#)

[Laboratory/Observational Studies of Biogenic Greenhouse Gases on the Early Earth](#)

[Impact Frustration and Subsequent Generation of Biologically Tenable Climates on Earth and Mars](#)

[Fe Isotope Biosignatures](#)

[Fractionation of Transition Metal Isotopes Mineralogical Biosignatures](#)

[Organic Molecules as Biosignatures](#)

[Astrobiology Funding to US Geological Survey](#)

[Magnetic Biosignatures](#)

[Martian Biogenic Gases](#)

[NO Title Submitted – JPL](#)

[Postdoctoral Fellows](#)

[EPO](#)

[Publications](#)

[Team Members](#)

Johnson Space Center

[Executive Summary](#)

[Project Reports](#)

[Archean Biosignatures](#)

[Mineral Biosignatures](#)

[New Technique Development and Application](#)

[Organic Biosignatures](#)

[Terrestrial Analogs and Martian Meteorites](#)

[Postdoctoral Fellows](#)

[EPO](#)
[Publications](#)
[Team Members](#)

Marine Biological Laboratory

[Executive Summary](#)
[Project Reports](#)

[Eukaryotic Biodiversity and Physiology at Acidic Extremes: Spain's Tinto River](#)

[Eukaryotic rRNA evolution: origins of "Crown Group taxa"](#)

[Eukaryotic origins and the evolution of cellular complexity – Eukaryotic rRNA evolution: early diverging eukaryotes](#)

[Ecological genomics](#)

[micro*scope \(<http://www.mbl.edu/microscope>\) – a web-based tool for microbial diversity research](#)

[Genes that Regulate Photosymbiotic Interactions](#)

[Diversity and physiology of prokaryotes in selected thermophilic and mesophilic environments that might resemble early Earth's biosphere](#)

[Evolution of Proteins](#)

[Microbial symbionts: Agents for reorganizing genome architectures.](#)

[Postdoctoral Fellows](#)
[EPO](#)
[Publications](#)
[Team Members](#)

Michigan State University

[Executive Summary](#)
[Project Reports](#)

[Bacterial Adaptation to Low Temperatures](#)

[Indigenous Bacteria of Arctic and Antarctic Permafrost](#)

[Genomic and Proteomic Analysis of Permafrost Bacteria](#)

[Postdoctoral Fellows](#)
[EPO](#)
[Publications](#)
[Team Members](#)

Pennsylvania State University

[Executive Summary](#)
[Project Reports](#)

[Modeling early atmospheric composition and climate](#)

[Evolution of atmospheric O₂, climate, and biosphere – K. Freeman](#)

[Evolution of Atmospheric O₂, Climate and the Terrestrial Biosphere – Capo](#)

[Evolution of Atmospheric O₂, Climate, and the Terrestrial Biosphere – Stewart](#)

[Evolution of atmospheric O₂, climate, and biosphere – Ohmoto](#)

[Causes and consequences of the diversification and extinction of metazoans: Neoproterozoic variations – Arthur](#)

[The Late Ordovician glaciation and mass extinction: environmental causes and evolutionary consequences – Mark Patzkowsky](#)

[Environment of Prebiotic Earth and the Origin of Life: Experimental Approach – Schoonen](#)

[Studies of Hydrogen Cyanide Chemistry](#)

[Enzymes of Ancient Metabolic Pathways](#)

[Isolation of psychrophilic microorganisms](#)

[Microbe–mineral interactions](#)

[GEOPULSE](#)

[A timescale for the evolution of life on Earth – Hedges](#)

[A timescale for the evolution of life on Earth – Nei](#)

[Evolution of atmospheric O₂, climate, and biosphere – Kump](#)

[Postdoctoral Fellows](#)

[EPO](#)

[Publications](#)

[Team Members](#)

Scripps Research Institute

[Executive Summary](#)

[Project Reports](#)

[Benner – Self–Reproducing Molecular Systems and Darwinian Chemistry](#)

[Ellington – Self–Reproducing Molecular Systems and Darwinian Chemistry](#)

[Ghadiri – Self–Reproducing Molecular Systems and Darwinian Chemistry](#)

[Rebek – Self–Reproducing Molecular Systems and Darwinian Chemistry](#)

[Switzer – Self–Reproducing Molecular Systems and Darwinian Chemistry](#)

[Postdoctoral Fellows](#)

[EPO](#)

[Publications](#)

[Team Members](#)

University of California, Los Angeles

[Executive Summary](#)
[Project Reports](#)

[Celestial Influences on Planetary Environments](#)

[Characterizing Earth's Early Life](#)

[Exploration for Life in the Solar System](#)

[Genomic Evolution and the Tree of Life](#)

[Geobiology and Geochemistry of Early Earth](#)

[Extra Solar Planetary Systems](#)

[Postdoctoral Fellows](#)

[EPO](#)

[Publications](#)

[Team Members](#)

University of Colorado, Boulder

[Executive Summary](#)
[Project Reports](#)

[Biogeochemistry of the Early Earth](#)

[Molecular Survey of Microbial Diversity in Hypersaline Ecosystems. Ecogenomics](#)

[Recruitment of Proteins to Serve New Functions](#)

[Habitability of Planetary Bodies](#)

[Potential habitability of Mars](#)

[Philosophical Issues in Astrobiology](#)

[The Formation of Planets Around Young Stars](#)

[Initiation of an RNA world](#)

[Symbiosis and the origin of multicellularity in photosynthetic organisms](#)

[Postdoctoral Fellows](#)

[EPO](#)

[Publications](#)

[Team Members](#)

University of Rhode Island

[Executive Summary](#)
[Project Reports](#)

[Subsurface Biospheres](#)

[Postdoctoral Fellows](#)
[EPO](#)
[Publications](#)
[Team Members](#)

University of Washington

[Executive Summary](#)
[Project Reports](#)

[First-Stage Biofilm Formation Under Extreme Conditions in Ice](#)

[Delivery of Organics to Earth and Earthlike Planets – Brownlee and Kress](#)

[Delivery of organic materials to planets](#)

[Dynamics of comets, asteroids, and planets](#)
