

ISSOL AND BIOASTRONOMY JOINT INTERNATIONAL CONFERENCE

Montpellier (France), July 3rd - 8th, 2011

ISSOL – the International Astrobiology Society and Bioastronomy (Commission 51 of the International Astronomical Union) have decided to join their triennial meetings and to hold their first combined international conference (Origins 2011) in Montpellier (France) in July 2011.

International Year of
CHEMISTRY
2011

Perspectives on the Origin of Life: an open dialogue

Ada Yonath
(Nobel 2009 - Chemistry)

Jean-Marie Lehn
To be confirmed
(Nobel 1987 - Chemistry)

Christian de Duve
(Nobel 1974 - Physiology or Medicine)

MAIN TOPICS & INVITED SPEAKERS

Origins: from stars to life

(Alessandro Morbidelli, Jose Cernicharo, Addy Pross, Gerald Joyce)

Biosignatures and clues of life

(Emmanuelle Javaux, Franck Selsis)

Early Earth processes

(Abigail Allwood, Minik Rosing)

Exoplanets and habitability

(Helmut Lammer, Sara Seager)

Space exploration

(David Des Marais, Alain Leger)

Early and minimal life

(Irene Chen)

Past and present solar system

(Jonathan Lunine, Dominique Bockelee-Morvan)

Prebiotic chemistry

(Nicholas Hud, John Sutherland)

Outreach and history of sciences

(Woody Sullivan, Martin Griffith, Jennifer Laing)

Evolutionary perspective

(Euan Nisbet, Anthony Poole)
